

HELP CREATE A LIFE *without limits*

SUPPORT HAND & UPPER LIMB RESEARCH

Hand and upper limb conditions can cause everyday tasks to become difficult and painful, with quality of life impacted by the loss of independence.

Researchers at Flinders University, led by Professor Greg Bain, are growing the depth and scope of assessment, intervention, management and treatment of hand and upper limb conditions. Their research is continuously improving outcomes for patients and improving their quality of life.

Help create a life without limits by supporting hand and upper limb research at Flinders University.

Enter your contact details, answer the security question and press the **Process Donation** button. You will later receive a receipt for your tax-deductible donation via email.

"Thank you for your generous donation to support hand and upper limb research. This will enable Flinders University's Department of Orthopaedic and Trauma Surgery to fund PhD students, orthopaedic surgery trainees and medical students to conduct critical research. Their research is leading to a better understanding of upper limb disorders, the development of new surgical techniques and importantly, improved outcomes and a better quality of life for our patients."

Professor Greg Bain
